STEP 2

Reuse the factory ball-style clamps to install the AWE Performance axle-back system onto the car.

Do not tighten the clamps until each side is fully installed.

Install the AWE exhaust tips with the included tip clamps.

Orient the tip so that the AWE logo is facing up and is centered in the rear valance, as shown in **Figure 2**.

Once the tips are in the desired location, tighten the factory ball clamps to spec, and tighten the tip clamp until the tip doesn't move, then turn the bolt one (1) full turn.

CARE

Once installed properly, your AWE Performance Exhaust will provide years of trouble-free performance.

The exhaust volume and sound will settle with usage; 800-1000 miles is required to break-in new exhaust systems.

Also please note that the rear **180Technology®** resonator has a small drain hole to allow condensation to escape. Water drops from this area are normal.

Periodic cleaning of exhaust tips is necessary to maintain proper finish, especially in areas prone to road salt and caustic deicing solutions. Use a mild soap and water solution or car wax to clean the finish. Avoid using metal polishes, as they can scratch the finish.
